

Nathan “Ivy” Bazan

Seattle, WA/Portland, OR • <https://ivybazan.com> • <https://github.com/IvyBazan> • coastalivy@gmail.com

EDUCATION

Vassar College, Poughkeepsie, NY

Bachelor of Science in Computer Science, May 2015

SKILLS

- **Programming languages** - Python: Proficient, Java: Proficient
- **File formats** - XML, Markdown, reStructuredText
- **Technologies** - Git, Docs-as-Code, CI/CD, Confluence, Jira, Machine Learning, AI, Agents, MCP Servers, REST APIs, SDKs, Cloud Computing, Adobe Analytics, PowerBI, Google Suite, Microsoft Office
- Experience with documentation build systems/management across open and closed source projects.
- Focus on AI/ML, including AI agents and associated tools.

EXPERIENCE

Snowflake, Bellevue, WA

Senior Programmer Writer

March 2025 - March 2026

- Wrote documentation for AI/ML features with a focus on agentic workflows, using AI tools to improve efficiency.
- Created a cross-functional team to refactor the documentation for Snowflake Intelligence, Snowflake’s enterprise agentic offering. Using input from PMs, developer advocates, and engineering, I delivered the refactor ahead of schedule, resulting in a decrease in the average customer adoption rate and improved stakeholder relationships.
- Designed and implemented task intake, sprint planning, and stakeholder reporting mechanisms for a team of 5 writers.

Amazon Web Services, Seattle, WA

Senior Programmer Writer and Content Strategy Lead
2025

March 2021 - March

- Managed complete lifecycle of AI/ML documentation launches for foundational Amazon SageMaker features across 5 PMs.
- Planned a 6 month effort to improve content quality for a 1,600 page developer guide with over 2 million annual page visits. Worked with PMs, doc organization leaders, VPs, and other stakeholders to remove low-performance content, resolve all content quality issues and 95% of SEO issues, and restructure existing content to make it easily ingestible by LLMs.
- Led re:Invent documentation planning and publishing for a team of 12, successfully coordinating 18 launches across 4 conference keynotes and 70 code reviews.
- Developed a consistent prioritization strategy for ~200 writers as part of a v-team focused on process improvements.
- Facilitated onboarding and long-term mentorship of new writers, including help with process issues, documentation build debugging, and instruction about writing to the style guide.

Programmer Writer

December 2018 – March 2021

- Managed open source documentation projects, such as the SageMaker Python SDK, written in Markdown and reStructuredText.
- Delivered quarterly documentation performance analysis, including site visitation metrics, customer feedback, and team input.

Microsoft, Redmond, WA

Technical Writer

July 2015 – November 2017

- Wrote high quality documentation for independent hardware vendors creating sensors and displays.
- Improved the efficiency of a 30 person organization by creating, with three of my peers, a Python-based system that automatically generated 5,000+ driver reference topics annually.
